

## SHRUB ROSE PLANT NAMED 'BAIOIST'

### Abstract of the Disclosure

A new and distinct variety of landscape shrub rose plant is provided which forms on a continuous basis in clusters attractive vibrant double red-orange blossoms with light rosy-orange on the under surface of the recurved petals. The plant exhibits a compact, upright and bushy growth habit, satiny medium green foliage, and excellent tolerance to Black Spot and Powdery Mildew. The attractive medium green glossy foliage contrasts nicely with the red-orange blossom coloration. A tough rose plant of good hardiness is provided. The plant can be grown to advantage as a specimen, border planting, or as a mass planting.
